Your first project

AI Foundry organizes development artifacts into projects— containers for managing permissions, monitoring, costs, and more. When you create a resource, a project is also created. This “default” project has more capabilities than projects that you create later. [Learn more.](#)

Default project name *	<div>StudyBuddy </div>

Content Review Policy

Azure AI Foundry provides access to Azure OpenAI models. To detect and mitigate harmful use of the Azure OpenAI Service, Microsoft logs the content you send to the Completions and image generations APIs as well as the content it sends back. If content is flagged by the service's filters, it may be reviewed by a Microsoft full-time employee

[Learn more about how Microsoft processes, uses, and stores your data](#)

[Apply for modified content filters and abuse monitoring](#)

[Review the Azure OpenAI code of conduct](#)
